

What are the three things you liked the most about the course?

References to extra material were provided.

Quick response from teacher and our TA regarding assignment questions.

Interactive quizzes using Mentimeter.

The teacher was very energetic and helpful to students.

The teacher provided me with guidance regarding my personal career.

The course was well planned and fun

1. The best teacher I have ever had.

2. The course is flexible, even if you did not attend workshops you can still get a good grade potentially.

3. The study material is very relevant and interesting.

- The teacher explained things very well and was always open for questions from students

- The course was really well designed and it was obvious that all the tasks, lectures, workshops were well planned and complemented each other well

- The course was really interactive and it was great to actually apply the techniques we learned in a workshop rather than just learning the theory. That way I understood it better and I also remembered everything better.

The role playing lecture, flipped classroom and discussion heavy lectures.

1. Mentimeter Quizzes

2. Interactive classroom

3. Lego Workshop

Good teacher

Good discussions

workshop

1. The reverse teaching style

2. The case study and making student take on a role

3. A lot of useful material

Rebekka

Rebekka

Flipped classroom and class exercises

The teacher seemed genuinely interested in the subject and answered all questions

The enthusiasm of the teacher and the Lego workshops

Well-organized module on Canvas, enthusiastic and helpful teacher, diverse in-class activities

The flipped classroom, the workshops were fun and educational, the role-playing in the classroom

The workshops were fun and I learned from them

The discussions during the lectures

The exercises that we did to practice different roles in organizations and the processes they use

The way and speed of teaching

-The teacher (clear explanations from the bottom up, dynamic tone, encourages discussions)

-TA's were very good with feedback on assignments

-Workshops (although I believe other methods would be better at teaching processes, this one was unique and fun)

- The lecturer was really sweet and competent and I'm really going to miss having her lectures.

- I loved the Mentimeter quizzes in the beginning. It felt like a warmup session during the lecture. And I loved how every answer was discussed. This really made the students feel like their thoughts mattered.

- The modules page on the course Canvas was really useful and made it easy to find relevant coursework. The lecturer put a lot of effort into this and it's very appreciated.

1. The flipped classroom format fit the course well. It allowed us a break from same way of learning and was very enjoyable.

2. The way the assignments and workshop was structured is really well done and well thought out. Shows a practical perspective of software process and its maturity development.

3. Very nice lecturer!!!

1. Lecture activities made it more enjoyable

2. The teacher was interested in her subject and knowledgeable

3. The teacher was fun and active with the students

The enthusiasm and presence of the professor.

Clear structure and relevance of assignments.

A large number of impactful in class activities.

1. The teacher's engaging teaching style and sense of humor made the class fun and interactive, making it easier to stay engaged and interested in the material. I also liked the Kahoot and Mentimeter

2. The class discussions were a valuable part of the course as it allowed us to challenge our own views and learn from the passionate views and different perspectives of the class members. It was fun to hear the insights of the class.

3. The Lego workshop provided a hands-on experience and allowed us to apply the concepts learned in class in a more realistic setting (as realistic as we could make in a school setting). It helped us to make improvement and solidify our understanding throughout the course.

1. Flipped classroom

2. Workshops

3. Take home exam makes assessment flexible and less stressful

The lecturer, the discussions and the material to be studied before lectures.

1- Available materials on Canvas

2- Clear structure of the course
